- **Instructed and mentored 250+ aspiring programmers in Data Structures and Algorithms**, empowering them with essential skills and knowledge to excel in the field.

Projects

Bloger | *NodeJS, ExpressJS, PostgresSQL* | Github Link   *June 2024*
- Developed a full-stack blogging website using Node.js, Express.js, and PostgreSQL, allowing users to log in seamlessly using Google OAuth for authentication.
- Implemented CRUD (Create, Read, Update, Delete) functionality for blogs, enabling users to add, edit, and delete their blog posts securely.

CsTrader| *NodeJS, ExpressJS, PostgresSQL* | Github Link   *July 2023*
- Developed a dynamic Counter Strike trading platform using Node.js, Express.js, and PostgreSQL, allowing users to log in securely using Steam OAuth for authentication.
- Implemented a sophisticated trading system where users can buy and sell in-game skins using an onsite balance, ensuring transactions are secure and transparent.
- Integrated Razorpay payment gateway to facilitate user deposits, allowing players to add funds securely using various payment methods such as credit/debit cards, net banking, and UPI.
